

tangent MCS-650

JUST THE SIZE YOU NEED..!

JUST THE SIZE YOU NEED...!

Sure, some people simply can't live without an extensive AV system with separate components. Others prefer to keep things compact and simple. The new Tangent MCS-650 is just the ticket for the latter group.

This mini-DVD system is a compact collection of components. The built-in DVD player plays DVD and DivX formats, and offers Dolby Digital and DTS sound outputs. Speaker and subwoofer outputs allow you to create a 2.1 channel sound solution. Great stereo sound is also provided through CD-audio playback. An integrated 3-in-one card reader and a USB connection give you access to music on a variety of media and devices.

A HDMI interface sends top-quality digital sound and picture to your television set through only a single cable. What's more, the built-in FM tuner lets you listen in to your preferred radio programmes as well.
